Letter of Intent

Dear Inventors on **Docket No 201821005237** dated 12th February 2018:

Mr. Devansh
Mr. Suraj Patil
Dr. Mr. Aditya Abhyankar

Incognetics Technologies Pvt. Ltd. (the Company) specializes in design of smart and Intelligent Frameworks that enable effective decisions. The Company consumes data in form of Images, Videos, Text, Numbers and extract insights that are useful for decisions. The Company works on both data at rest and stream data for identifying useful patterns. In nutshell, the Company helps the customer harvest data for knowledge.

The Company is associated with the Department of Technology of SP Pune University for some time now. When the Company came across the Patent filled on "**Novel method for Detecting Parkinson's Disease in an Individual**", we found it interesting and in-line with business verticals of our enterprise.

With this letter, we would like to express our intent to purchase the said patent with following financial terms proposed:

1. A One-time royalty of INR 1,00,000.00 (Rupees One Lakh Only) for the patent while executing the license agreement.
2. Mutually discussed and agreed revenue share in every successful commercialization on a case-by-case basis.
3. Commercialization of this patent is at the sole discretion of the Company.
4. This Letter of Intent is valid for 6 months from the date of signatures of this Letter of Intent.
5. The inventors of the Patent cannot license or sub-license or share this patent or its information or its corresponding technology, in its entirety or in part thereof, in any format – written, electronically or by any other communication means – for a period of 3 years from date of execution of LOI and subsequently the license agreement.

We look forward to favourable response from your end.

With regards,

Rahul Toshniwal
Director
